

ALL PURPOSE PLANT AND LAWN FOOD

NATURE'S SLOW-RELEASE NITROGEN

Organic gardening with what comes naturally.

coop-poop.com

Neighbor Approved.

Low odor and high performance make Coop Poop™ a neighborhood favorite.

Sustainable.

Improves soil health, stimulates microbe activity.

Beautiful plants. Happy people.

Easy to use, high in calcium, apply at any time, will not burn plants.

Organic gardening with what comes naturally. It's what Coop Poop is all about.

Coop Poop organic fertilizer is naturally packed with the essential nutrients your soil needs to grow hearty, healthy plants.

This Aerobically Composted Chicken Manure (ACCM) is high in calcium for strong plant tissue development and disease resistance, while also improving photosynthesis, nutrient uptake and starch conversion. Plus, Coop Poop is virtually odor-free compared to the pungent scent normally associated with other manure-based composts.

But don't just take our word for it. Coop Poop is also backed by years of reliable university research and has consistently outperformed other organic alternatives available.

Benefits

- Easy to use and apply at any time
- Will not burn
- High performance improves soil health
- Stimulates microbe activity
- High in calcium
- Low odor

Nutrition Source

Aerobically Composted Chicken Manure: An all-natural, slow-release, non-burning organic blend rich in humates, carbohydrates and trace minerals, which naturally enhances any soil type and promotes plant quality.

Certified against National Organic Standards by the Organic Materials Review Institute.

Nutrient-rich soil breeds vibrant plants.

By simply improving your soil, you will beautify your garden, and over time, reduce the amount of maintenance required, and provide a robust environment for your plants and family.

Nutrient-rich soil is a diverse ecosystem of organic matter, air, water and minerals that fosters a large population of beneficial microorganisms and bacterium, which cycle nutrients from the soil to the plant and back again. You must have organic material in order to feed all those microorganisms that will do their part to take care of your plants the natural, organic way. Properly composted egg-laying chicken manure is one of the best products you can add to your soil to build organic matter, stimulate microbial populations and feed your plants organically. Many people today are beginning to understand that organic gardens can produce not only heartier plants – but heartier food.

Guaranteed Analysis

Total Nitrogen	(N)	2.0%
0.38% Water Soluble Nitrogen		
1.62% Water Insoluble Nitrogen*
